

**DUST-PROOF GASKET AND UPRIGHT PLUGS KIT**

**Functions**

Package includes 4 central upright caps, 2 pairs of damping covers and 2 dust-proof covers for a window or sliding door made of aluminium.

Online data sheet

**Technical features**

The machining caps improve the appearance of the sash by covering the machining on the central upright.

The damper plugs, in addition to having a burglar-proof function, prevent the sash from slamming against the frame when closing.

The dust cap fits to the upper and lower cross beams of the fixed frame using self-tapping screws.

The sponge fits snugly against the sash to prevent dust and water entering.

**Materials**

Black anodised extruded aluminium body

Zinc plated steel screws

Brushes and sponge in expanded EPDM

Machining cover in black polyamide

Rubber damper plug
