

CHIUSURE ED ACCESSORI SUPPLEMENTARI FUTURA 3D 130

Funzioni

Le chiusure supplementari danno la possibilità di aggiungere elementi di chiusura qualora aumentino le dimensioni dell'infisso o quando sia necessario avere dei punti di chiusura sui traversi o sul montante lato cerniere.

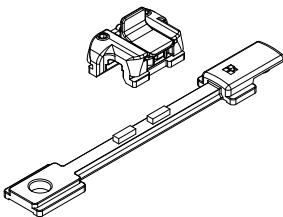

Sulla base delle dimensioni dell'infisso saranno da utilizzare in abbinamento a questo meccanismo le chiusure supplementari (per $H > 1200$ mm e $L > 1000$ mm) e il braccio supplementare (che è obbligatorio per $L > 1000$ mm).
